

Silver Rope (Polyethylene)

Product information

Silver ropes are manufactured using a special Polyethylene (PE) extrusion process which gives the rope superior strength and a distinctive hairy appearance which enhances wear resistance and knotting performance. Silver rope is strong and versatile with excellent handling properties. Ideally suited to general and industrial applications, particularly in the marine industries where high resistance to abrasion and floating buoyancy are advantageous.

Features:

- Superior strength
- Wear and abrasion resistant
- UV stabilized with excellent weathering properties
- Surface characteristics provide excellent knotting and handling properties
- Floats
- Not affected by water
- Resistant to fungal attack

Material: Polyethylene

Part Code	Diameter mm	MBL ton	Length	Colour	Weight kg/m
